 CLINICAL CHEMISTRY, WINSTON, US, Vol. 43, no.
 3, 1997, pages 518-522, XP1018908, ISSN: 00099147
- D5: PFAFFENBACH B ET AL: "Nicht-invasiver ¹³C-Oktansäureatemtest zur Messung der Magenentleerung einer festen Testmahlzeith Korrelation mit der Szintigraphie bei Diabetikern und Reproduzierbarkeit bei gesunden Probanden", Z. GASTROENTEROL., vol. 33, no. 3, MARCH 1995 (1995-03), pages 141-145, XP8013991, ISSN: 0044-2771
- D5 discloses a process for determining gastric emptying by the oral ingestion of a test substance and measurement of residence time in the stomach,

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

the test substance containing ¹³C-octanoic acid bound to egg yolk (page 142, right-hand column, paragraph 6; page 144, left-hand column, paragraph 2). The measured variables are evaluated independently of endogenous conversion factors.

Therefore, all the features of claim 1 are known from D5 and the subject matter of this claim is consequently not novel within the meaning of PCT Article 33(2).

2. Dependent claim 2 does not contain any features which, in combination with the features of claim 1, meet the PCT requirements for inventive step, since the test meal specified in claim 2 is known from D1.

Form PCT/IPEA/409 (Box V) (January 1994)
